

**For the treatment of nappy rash - it is important that you follow these instructions carefully.** After removing the soiled nappy, clean and wash the affected area, drying with a soft towel. After washing your hands, **dab a small amount (pea size)** of Metanium Ointment over the sore area with your fingertip. **It is important to spread this thinly** so that the skin texture can be clearly seen through it. Repeat at each nappy change to treat nappy rash. Keep the tube nozzle clean of residue product to ensure the cap can be closed tightly. Do not use Metanium Ointment if your baby is hypersensitive to any of its ingredients. Very rarely Metanium Ointment can cause skin irritation. If any unusual effects occur, discontinue use and consult your pharmacist or doctor. If symptoms persist consult your doctor.

**FOR EXTERNAL USE ONLY**

**Keep out of the sight and reach of children.**

**Caution:** Product may stain fabrics.

**! If baby accidentally swallows some** see a doctor straight away. Take the pack with you to show which medicine has been swallowed.

**Ointment for topical use.**
