

Keep this carton as it contains important information about your medicine.

How to use: Adults and children over 6. Apply a little ointment to the wart once a day. Wash hands after use. Rub the area gently with a file or pumice stone once a week. Repeat treatment daily. The length of time to treat a wart may vary. Improvement can be seen in a few weeks but complete removal can take up to 12 weeks. If the wart is not removed after 12 weeks or if acute pain and discomfort occurs during treatment seek medical advice.

Do not use: on children under 6 • on broken or healthy skin • near face, neck, armpits, breasts, bottom, or genital regions • on moles, birthmarks, soft or hairy warts • if you are allergic to aspirin or any of the ingredients • if you are diabetic, have poor blood circulation or numbness in your feet or hands, unless advised by your doctor.

Take Care: Keep Wartex away from the eyes, nose, mouth and normal skin. Wash hands after using, if you accidentally apply Wartex to the eyes, nose or mouth you should flush with water for 15 minutes. If you accidentally apply Wartex to normal skin, wash it off immediately.

Side effects: If you notice anything unusual or pain persists, stop using the ointment and consult your doctor.

Keep out of reach and sight of children.

Do not use after expiry date (EXP), on carton & tube. Do not store above 25°C. Do not freeze.
